### Golf Focus - Putting Green 10mm

Golf Focus is a premium synthetic golf putting green surface ideal for both the professional and amateur golfer to practice their putting techniques. It has an extremely dense pile, making it exceptionally hard-wearing. Golf focus is a non-directional product, so you can be assured each putt from all directions will travel consistently.

The Golf Focus surface is best optimised when combined with one of our LEISURE Series 35mm products to use as the fringe. You can even have a 2-tier short/long height combination to really create a stunning putting green of championship quality in your own backyard.

### FEATURES

- Maximum UV protection
- Extreme durability
- Reliable traction
- Optimum ball interaction
- High performance
